[400 friends and no one to call: breaking through isolation and building community](#)

We can be well connected, with 400 friends on Facebook and still have no one to count on. Ironically, despite social media, social isolation is a growing epidemic in the United States. The National Science Foundation reported in 2014 that the number of Americans with no close friends has tripled since 1985. One out of four Americans has no one with whom they can talk about their personal troubles. An unprecedented number of Americans are living alone, particularly people over sixty (one in three seniors compared to one in five just ten years ago). Millennials and post-millennials increasingly report discomfort and avoidance with face-to-face conversations. Social isolation can shatter our confidence. In isolating times, we're not only lonely, but we're ashamed of our loneliness because our society stigmatizes people who are alone without support. As a single, fifty-eight-year-old woman who finds herself stranded after major surgery, Val Walker has woven into the narrative her own story. As a well-established rehabilitation counsellor, she was too embarrassed to reveal on social media how utterly isolated she was by asking for someone to help, and it felt agonizingly awkward calling colleagues out of the blue. As she recovered, Val found her voice and developed a plan of action for people who lack social support, not only to heal from the pain of isolation, but to create a solid strategy for rebuilding support. 400 Friends and No One to Call spells out the how-tos for befriending our wider community, building a social safety net, and fostering our sense of belonging. On a deeper level, we are invited to befriend our loneliness, rather than feel ashamed of it, and open our hearts and minds to others trapped in isolation.

[Addiction medicine](#)

An evidence-based, concise, and practical guide to the management of people with substance use disorders. Addiction Medicine, Second Edition, covers specific types of psychoactive substance and treatment options, focusing on specific groups placing addiction medicine within the broad professional and legal context.

Contents:

Acknowledgements; Editors and authors; Contributors; Symbols and abbreviations; 1 The nature of addictive disorders; 2 Epidemiology and prevention; 3 Pharmacology and pathophysiology
4 The scope of intervention 5 Establishing the diagnosis; 6 Acute care; 7 Ongoing management of substance use disorders; 8 Tobacco; 9 Alcohol; 10 Cannabis; 11 Opioids; 12 Pain and opioids; 13 Benzodiazepines and the other sedatives; hypnotics; 14 Psychostimulants 15 Hallucinogens and dissociative drugs 16 Other drugs; 17 Polysubstance use; 18 Injecting drug use; 19 Gambling; 20 Gaming; 21 Other addictive disorders; 22 Psychiatric co-morbidity; 23 Specific clinical situations; 24 Special populations 25 Substance use and specific healthcare settings 26 Legal and ethical issues; 27 Resources; Index;

[An introduction to population-level prevention of non-communicable diseases](#)

Provides an unparalleled overview of population-based approaches to the prevention of non-communicable diseases, reflecting the latest research in the field, and a key resource for anyone with an interest in NCD prevention as they develop the knowledge and skills needed for effective population-based prevention strategies.

Contents:

Abbreviations; Part I Introduction; 1 Introduction; Part II Problem definition; 2 Understanding NCDs; 3 NCDs: Risk factors and determinants; 4 The socio-political landscape of NCDs, Part I; 5 The socio-political landscape of NCDs, Part II; 6 Public health advocacy for the prevention of NCDs; 7 Screening and surveillance; Part III Solution generation; 8 Evidence for population-level approaches to the prevention of NCDs: Evaluating effectiveness and modelling 9 Evidence for population-level approaches to the prevention of NCDs: Economic evaluation 10 Developing a prevention strategy; Part IV Resource mobilization and implementation; 11 Capacity building; 12 Implementation of an NCD prevention strategy; 13 Implementation: Beyond the health sector; Part V Monitoring progress; 14 Evaluation and monitoring; 15 Revisiting the stages of the policy cycle; Index

[Beating Drug Addiction: Get All the Support And Guidance You Need To Be A Success At Beating Drugs!](#)

This Book Is One of The Most Valuable Resources in The World When It Comes to Helpful Info On Avoiding And Beating A Fatal Drug Addiction! Is the fact that you would like to kick addictions but just don't know how making your life difficult or maybe even miserable? Does it seem like you've tried everything in your power to figure it out, and yet, despite your best intentions, you're still problems with: * Not knowing how to even get started * Not understanding even where to start with accepting help * Not knowing about rehab If this describes you, then you are in luck today... First, you are NOT alone! It may seem like it sometimes, but not knowing how to get started with beating an addiction is far more common than you'd think. Many people think that their addiction problems will never be solved or that change is impossible. This is not true! Your lack of knowledge in this area may not be your fault, but that doesn't mean that you shouldn't or can't do anything to find out everything you need to know to finally be a success! Drug addiction is a serious problem, and it is not only found in certain areas or with certain types of people. Addiction is found everywhere and with all types of people. It does not matter if a person is rich or poor, strong, or weak or what neighborhood or country they live in, addiction exists. That is why it is so important that people are well informed on the subject of addiction because no matter who you are or where you are, if you make poor decisions involving drugs addiction is waiting just around the corner. This powerful book will provide you with everything you need to know to be a success and achieve your goal of getting clean to a successful place. With this product, and its great information on running your own food business it will walk you, step by step, through the exact process we developed to help people get all the info they need to be a success. Within this book you will gain knowledge and know how to deal with the following through our easy to learn modules: * What Is Addiction * Why Counselling Plays an Important Role in Addiction Treatment * Group Counselling * Understanding Support Mechanisms * Understanding * The Warning Signs of Addiction * The Root of the Problem * Bringing It All Together * Final Summary & Accreditation In This Book, You Will Learn: * Drug Addiction Basics * Accept That You Need Help * Drug Detox Basics * Drug Rehab Basics And so much more!

Contents:

Intro; Foreword; Chapter 1: Drug Addiction Basics; Chapter 2: Accept That You Need Help; Chapter 3: Drug Detox Basics; Chapter 4: Drug Rehab Basics; Chapter 5: Support Groups and Follow-Up Programs; Chapter 6: Nutrition for Recovering Drug Addicts; Chapter 7: Tips for Family Members and Friends; Chapter 8: What Can Be Lost Due to Drug Addiction;

[Bottled: a mom's guide to early recovery](#)

An unflinching and hilarious memoir about recovery as a mother of young kids, *Bottled* explains the perils moms face with drinking and chronicles the author's path to recovery, from hitting bottom to the months of early sobriety--a blur of pain and chaos--to her now (in)frequent moments of peace. Punctuated by potent, laugh-out-loud sarcasm, *Bottled* offers practical suggestions on how to be a sober, present-in-the-moment mom, one day at a time, and provides much needed levity on an issue too often treated with deadly seriousness. Dana Bowman is a long-time English teacher and part-time professor in the department of English at Bethany College, Kansas. Author of the popular [mombsieblog.com](#), she leads and presents workshops on both writing and addiction, with a special emphasis on being a woman in recovery while parenting young children.

Contents:

Introduction; PART ONE: The Before; Chapter One; Chapter Two; Chapter Three; Chapter Four; Chapter Five; Chapter Six; Chapter Seven; Chapter Eight; Chapter Nine; PART TWO: The During; Chapter Ten; Chapter Eleven; Chapter Twelve; Chapter Thirteen; Chapter Fourteen; Chapter Fifteen; Chapter Sixteen; Chapter Seventeen; Chapter Eighteen; Chapter Nineteen; Chapter Twenty; PART THREE: The Now; Chapter Twenty-One; Chapter Twenty-Two; Chapter Twenty-Three; Chapter Twenty-Four; Self-Assessment Quiz; Resources

[Club drugs](#)

When people accept drugs from strangers at clubs or parties, they have no idea what is really in those pills. This title explores how club drugs affect the body, the laws surrounding them, how they affect society, and the ways people can prevent abuse of these drugs.

Contents:

Club drugs in real life -- Club drug history and use -- LSD -- Other hallucinogens -- MDMA -- Ketamine, GHB, and rohypnol -- Inhalants -- Club drugs and society -- Preventing club drug abuse.

[Critical Issues in Alcohol and Drugs of Abuse Testing](#)

Critical Issues in Alcohol and Drugs of Abuse Testing, Second Edition, addresses the general principles and technological advances for measuring drugs and alcohol, along with the pitfalls of drugs of abuse testing. Many designer drugs, for example, are not routinely tested in drugs of abuse panels and may go undetected in a drug test. This updated edition is a must-have for clinical pathologists, toxicologists, clinicians, and medical review officers and regulators, bridging the gap between technical and clinical information. Topics of note include the monitoring of pain management drugs, bath salts, spices (synthetic marijuana), designer drugs and date rape drugs, and more.

Contents:

- Alcohol: Pharmacokinetics, Health Benefits with Moderate Consumption and Toxicity
2. Alcohol Analysis in Various Matrixes: Clinical versus Forensic Testing
 3. Alcohol Biomarkers: Clinical Issues and Analytical Methods
 4. Genetic Markers Related to Alcohol Use and Abuse
 5. Ethylene Glycol and Other Glycols: Testing and Interpretation Issues
 6. Introduction to Drugs of Abuse
 7. Legal Aspects of Drug Testing in U.S. Military and Civil Courts
 8. Pharmacogenomics of Drugs of Abuse
 9. Immunoassay Design for Screening of Drugs of Abuse
 10. Issues of Interferences with Immunoassays used for Screening of Drugs of Abuse in Urine
 11. Point of Care Devices for Drugs of Abuse Testing: Limitations and Pitfalls
 12. Drugs of Abuse Screening and Confirmation with Lower Cutoff values
 13. Overview of Analytical Methods in Drugs of Abuse Analysis: Gas Chromatography/Mass Spectrometry, Liquid Chromatography Combined with Tandem Mass Spectrometry and Related Methods
 14. High Resolution Mass Spectrometry: An Emerging Analytical method for drug testing
 15. Confirmation Methods for SAMHSA Drugs and Other Commonly Abused Drugs
 16. Critical Issues when Testing for Amphetamine Type Stimulants: Pitfalls of Immunoassay Screening and Mass Spectrometric Confirmation for Amphetamines, Methamphetamines, and Designer Amphetamines
 17. Cocaine, Crack Cocaine and Ethanol: A Deadly Mix
 18. Drug assisted sexual assaults: Toxicology, Fatality and Analytical Challenge
 19. Overview of Common Designer Drugs
 20. Novel Psychoactive Substances: An Overview
 21. Review of Bath Salts on Illicit Drug Market
 22. Review of Synthetic Cannabinoids on Illicit Drug Market
 23. Application of Liquid chromatography combined with high resolution mass spectrometry for urine drug testing.
 24. Forensic Toxicology in Death Investigation
 25. Drug Testing in Pain Management
 26. How do people try to beat drugs test? Effects of synthetic urine, substituted urine, diluted urine and in vitro urinary adulterants on drugs of abuse testing.
 27. When Hospital Toxicology Report is Negative in a Suspected Overdosed Patient: Strategy of Comprehensive Drug Screen using Liquid Chromatography combined with Mass Spectrometry.
 28. Testing of Drugs in Oral Fluid, Sweat, Hair and Nail: analytical, Interpretative and Specimen Adulteration Issues
 29. Advances in Meconium Analysis for Assessment of Neonatal Drug Exposure

30. Analytical True Positive Drug Tests Due to Use of Prescription and Non-Prescription Medications

31. Analytical True Positive: Poppy Seed Products and Opiate Analysis

32. Miscellaneous Issues: Paper Money contaminated with Cocaine and Other Drugs, Cocaine Containing Herbal Teas, Passive Exposure of Marijuana, Ingestion of Hemp Oil and Occupational Exposure to Controlled Substances

33. Abuse of Magic Mushroom, Peyote cactus, LSD, Khat, and Volatiles

34. Performance Enhancing Drugs in Sports

[Cultures of intoxication: key issues and debates](#)

This book considers the global discourses and debates about 'intoxication', engaging in critical academic discussion around this concept. The problems in defining intoxication are considered, alongside the meanings of intoxication and how these meanings often differ across diverse drug using populations. The way that intoxication has been engaged with over the centuries has affected how particular groups are perceived and responded to, resulting in punitive responses such as drug prohibition, alongside harsh treatment of those who are seen to transgress societal norms and values. Therefore, this collection seeks to unsettle dominant discourses about intoxication and to consider this concept in new, critical ways. Ways of being intoxicated are also defined in this book in their broadest sense; from 'energy drinks' and other legal drugs, to recreational use of illicit drugs such as ecstasy, to 'problematic' drug use.

Contents:

1. Introduction, Fiona Hutton -- 2. Alcohol and Intoxication, Antonia Lyons And Kate Kersey -- 3. Smoking and Intoxication: From Control To The Buzz, Helen Keane -- 4. Illicit Drugs and Intoxication, Angus Bancroft -- 5. New Psychoactive Substances (NPS) And Intoxication, Fiona Hutton -- 6. Alcohol Mixed with Energy Drinks (Amed) And Intoxication, Nic Droste, Amy Peacock, Amy Pennay And Peter Miller -- 7. Sexualities and Intoxication: "To Be Intoxicated Is to Still Be Me, Just A Little Blurry": Drugs, Enhancement And Transformation In LGBTQ Cultures, Kira Pienaar, Dan Murphy, Kane Race, Toby Lea -- 8. Ethnicities and Intoxication, Sarah Herbert And Tim Mccreanor -- 9. Femininities and Intoxication, Fiona Hutton -- 10. Masculinities and Intoxication: Notes Towards A Co-Constitutive Approach, David Moore -- 11. Media and Intoxication: Media Representations of The Intoxicated, Tammy Ayres and Stuart Taylor -- 12. Social Media and Intoxication: "Tweaker Nation": Intoxication and Social Media, Andy Rudock -- 13. Societal Responses to Intoxication, Robin Room -- 14. Intoxication and Harm Reduction, Adrian Barton.

[Drug Abuse Sourcebook, 6th Ed](#)

Provides information about abuse of illegal drugs and misuse of prescription and over-the-counter medications. Describes specific drugs, their health impacts, addiction potential, and harms to individuals, families, and communities. Drug treatment and recovery options and information on drug testing and drug-use prevention.

Contents:

Intro; Table of Contents; Preface; Part One-Facts and Statistics about Drug Abuse in the United States; Chapter 1-Prevalence of Drug Abuse in the United States; Chapter 2-Drugs: Abuse and Addiction; Section 2.1-What Is Drug Abuse?; Section 2.2-What Is Drug Addiction?; Chapter 3-How Drugs Impact Brain; Chapter 4-Genetics and Epigenetics of Addiction; Chapter 5-Drug Abuse and Related Hospitalization Costs; Section 5.1-Substance Abuse Cost to Society; Section 5.2-Drug-Related Hospital Emergency Room Visits; Section 5.3-Increase in Emergency Room Visits Related to Ecstasy Section 5.4-Deaths from Drug Overdoses Chapter 6-Understanding the Legal Use of Controlled Substances; Section 6.1-Prescriptions for Controlled Substances; Section 6.2-Is Marijuana Medicine?; Chapter 7-Regulations Regarding Controlled Substances; Section 7.1-The Controlled Substances Act and the Schedule Classifications; Section 7.2-Combat Methamphetamine Epidemic Act; Chapter 8-Drugs-Shatter the Myths; Chapter 9-Substance-Abuse Treatment Statistics; Part Two-Drug Abuse and Specific Populations; Chapter 10-Adolescent Drug Abuse; Section 10.1-Trends in Adolescent Drug Abuse Section 10.2-Reasons Adolescents Try Drugs and Alcohol Section 10.3-Adolescents and Prescription-Drug Misuse; Section 10.4-Adolescent Marijuana Use; Section 10.5-Adolescents and Opioids; Section 10.6-School Dropouts and Substance Abuse; Chapter 11-Drug Use among College Students; Chapter 12-Substance-Abuse Issues of Concern to Women; Section 12.1-Alcohol-Use Disorder, Substance-Use Disorder, and Addiction among Women; Section 12.2-Substance Use While Pregnant and Breastfeeding; Section 12.3-Negative Consequences of Prenatal Exposure to Drugs Section 12.4-What Women Need to Know about Date Rape Drugs Chapter 13-Cigarette Smoking and Tobacco Use among People of Low Socioeconomic Status; Chapter 14-Substance Abuse in the Workplace; Chapter 15-Seniors and Drug Abuse; Chapter 16-Substance Abuse in the LGBT Community; Chapter 17-Substance Abuse in the Racial and Ethnic Minority Populations; Chapter 18-Drug Abuse in Other Populations; Section 18.1-Veterans and Drug Abuse; Section 18.2-Criminal Justice Populations and Substance Abuse; Section 18.3-Substance-Use Disorders in People with Disabilities; Part Three-Drugs of Abuse Chapter 19-Introduction to Drug Classes Chapter 20-Anabolic Steroids and Related Drugs Used as Performance Enhancers; Section 20.1-Anabolic Steroids; Section 20.2-Clenbuterol; Section 20.3-Human Growth Hormone (hGH); Chapter 21-Cannabinoids; Section 21.1-Cannabis and Cannabinoids; Section 21.2-Synthetic Cannabinoids (K2/Spice); Chapter

22-Club Drugs; Section 22.1-What Are Club Drugs?; Section 22.2-Gamma-Hydroxybutyrate (GHB); Section 22.3-Ketamine; Section 22.4-Rohypnol; Chapter 23-Dissociative Drugs; Section 23.1-Dextromethorphan (DXM); Section 23.2-Phencyclidine (PCP)

[Drug Free Life: Learning About Defeat Drugs and Live Free Can Have Amazing Benefits for Your Life! Prevent substance abuse and take control of your life!](#)

Being addicted to drugs is a complicated matter condition that's been specified as a disorder that evidences in the obsessional thinking about and utilization of drugs. It's a matter that might continue to get worse and become disastrous and deadly if left untreated. Drugs work by impacting the chemicals in the brain and bringing on an unreal state of euphoria or a 'high'. However, as the body becomes used to the effects of the drugs, it calls for more and more to accomplish the same impact, therefore beginning a ceaseless pursuit to accomplish this fake happiness - with dreaded aftermaths. As the disease advances, substance abusers will let relationships, occupations, studies, careers and youngsters fall by the wayside as the substances turn into a key requirement in their life. Individuals addicted to drugs might likewise discover themselves in self-denial. For addicts to carry on such a destructive, self-harming and detrimental way of life there needs to be a really potent level of denial existing to keep them from totally discovering the reality and truth of the illness. Consequently, self-denial lives as a survival mechanism to protect the disease. With drug abuse treatment and knowledge, addiction may be addressed, and a better, fitter lifestyle acquired. Begin your journey today!

[Drug policy and the public good](#)

Drug Policy and the Public Good is an objective analytical basis on which to build global drug policies. It presents the accumulated scientific knowledge on drug use in relation to policy development on a national and international level. It also presents new epidemiological data on the global dimensions of drug misuse.

Contents:

- Framing the issues -- Matters of substance -- Drug use in global perspective -- Harms associated with illicit drug use -- Illegal markets : the economics and social costs of drug distribution -- The legal market : prescription and diversion of psychopharmaceuticals -- Strategies and interventions to reduce drug use and related harm : section overview -- Preventing illicit drug use by young people -- Health and social services for drug users -- Supply control for illegal markets -- Criminalization and decriminalization of drug possession -- Managing psychopharmaceutical drugs under prescription regimes -- Drug policy and control at the international level --

Legalizing the supply of cannabis -- -- Treatment systems for drug users --
Summary and conclusions.

[Drug-impaired driving: background, consequences and safety issues.](#)

Everyone knows that driving while under the influence of alcohol is dangerous and unacceptable, and there are methods to identify and apprehend those who break the law. Unfortunately, the consequence of driving under the influence of drugs has not been raised until recently, and drugged driving presents new challenges to both law enforcement and health professionals. Amid the devastating opioid crisis and as more states legalize the use of marijuana, tackling this problem is now more important than ever.

Contents:

Chapter 1. Examining Drug-Impaired Driving

Chapter 2. Marijuana Use and Highway Safety

David Randall Peterman

Index

[Drugs and child maltreatment](#)

This book combines experience in child protection with expertise in clinical pharmacology and forensic toxicology, to set out a broad contemporary understanding of child maltreatment with drugs. It explores presentations that range through ante-natal exposure, factitious illness, deliberate poisoning, drug accidents while in the care of drug-affected adults, misuse of therapeutic drugs and the drug-related death of a child. It describes how to recognise where deliberate drug exposure or perversion of proper therapeutics is being used to harm a child, how to use laboratory testing to confirm a diagnosis, how to combine medical and social care with the need to gather legal evidence and how to deploy social, medical, and legal resources for child protection. The roles of the forensic toxicologist and contemporary forensic laboratory methods in resolving cryptic presentations are discussed in each context. There is guidance on effective communication about drugs within the child protection team and on writing reports for legal purposes, on the way to returning the child to safety. The book also explores the particular difficulties that arise in reconciling parents' rights and cultural beliefs with the obligation to document a child's drug exposure and in dealing with parents and carers who themselves may be drug impaired.

Contents:

The child harmed by drugs -- Identifying the drug -- The clinical

presentations -- Laboratory investigation of drug exposure -- Social and family context and its relevance to child maltreatment through drugs --

Protecting the child after a diagnosis of maltreatment through drugs --

Writing a medico-legal report in a case of child maltreatment with drugs --

Conclusions.

[Families bereaved by alcohol or drugs: research on experiences, coping and support](#)

Individuals bereaved by the drug- or alcohol-related death of a family member represent a sizeable group worldwide. *Families Bereaved by Alcohol or Drugs* is the long-awaited result of an important and ambitious research project into the experiences commonly encountered by members of this stigmatized and vulnerable group. Based on focus groups with the practitioners and service personnel who support grieving relatives following the loss of a loved one to alcohol or drugs, as well as interviews with the largest qualitative sample of adults bereaved by substance use that has been reported to date, this much-needed contribution to research on addiction and bereavement identifies four major reasons why grief following this tragic kind of death is particularly difficult. By examining the experiences of a wide range of stakeholders, including practitioners and policymakers in health, social care and the criminal justice system, the research contained within this book underscores the large number of organizations that play a role in the implementation of official procedure following a drug- or alcohol-related death and identifies significant gaps in the system that bereaved individuals must negotiate. Grounded in extensive and rigorous academic research, *Families Bereaved by Alcohol or Drugs* is essential reading for academics, researchers and postgraduate students in the fields of mental health and addiction, social work and social studies, psychology, family studies and bereavement. The book should also be of interest to anyone with a professional interest in bereavement or substance use.

Contents:

Foreword (William Feigelman)

Introduction (Christine Valentine and Linda Bauld)

Part 1: Coping (Christine Valentine and Linda Bauld)

1. Families Living with and Bereaved by Substance Use (Lorna Templeton and Richard Velleman)

2. The Impact of a Substance-related Death (Allison Ford, Jennifer McKell, Lorna Templeton and Christine Valentine)

3. Managing Stigma (Tony Walter and Allison Ford)

4. Remembering a Life that Involved Substance Use (Christine Valentine and Lorna Templeton)

5. The Diversity of Bereavement through Substance Use (Lorna Templeton, Jennifer McKell, Richard Velleman and Gordon Hay)

Part 2: Support (Christine Valentine and Linda Bauld)

6. Dealing with Substance-related Deaths (Jennifer McKell, Christine Valentine and Tony Walter)

7. Improving the Responses of Services (Peter Cartwright, Lorna Templeton and Gordon Hay)

8. Conclusion (Christine Valentine and Linda Bauld)

[Fundamentals of LGBT substance use disorders: multiple identities, multiple challenges](#)

In this new book, the successor to the classic in the field *Counseling Lesbian, Gay, Bisexual, and Transgender Substance Abusers: Dual Identities* by Dana G. Finnegan and Emily B. McNally, Michael Shelton reviews the empirical literature and synthesizes what we know about the prevalence of LGBT substance use, abuse, and treatment availability, emphasizing the need for affirmative therapeutic practices. The principles of trauma-informed and culturally competent treatment/intervention are explained and assessed, as well as the challenges of minority stress and microaggressions experienced by the LGBT population. Separate sections focus on the sub-populations of lesbians, gay men, bisexuals, and transgender individuals. Separate chapters focus on LGBT youth, the elderly, family constellations and concerns, criminal justice issues, and LGBT rural substance abuse. This volume provides an introduction to the field that will be useful both as a primary textbook and as a handbook/reference for LGBT-focused and general substance-use disorder clinics and their administrators, clinicians, trainees, allies and volunteers.

Contents:

An introduction to LGBT substance use disorders -- Factors leading to LGBT substance abuse -- Treatment of LGBT substance abuse -- Trans people and substance use -- Bisexual individuals and substance use -- Lesbians and substance use -- Gay men and substance use -- LGBT youth and substance use -- LGBT elders and substance use -- Substance use and LGBT family constellations -- LGBT substance users in the criminal justice system -- LGBT individuals in rural environments.

[High: everything you want to know about drugs, alcohol, and addiction](#)

Just Say Know! With drug education for children more important than ever, this nonfiction book draws on the experiences of the NY Times bestselling father/son team of David and Nic Sheff to provide all the information teens and tweens need to know about drugs, alcohol, and addiction. From David Sheff, author of *Beautiful Boy* (2008), and Nic Sheff, author of *Tweak: Growing Up on Methamphetamines* (2008), comes the ultimate resource for learning about the realities of drugs and alcohol for middle grade readers. This book tells it as it is, with testimonials from peers who have been there and families who have lived through the addiction of a loved one, along with the cold, hard facts about what drugs and alcohol do to our bodies. From how to navigate peer pressure to outlets for stress to the potential consequences for experimenting, Nic and David Sheff lay out the facts so that middle grade readers can educate themselves.

[Humanizing addiction practice: blending science and personal transformation](#)

This original, eloquent, compassionate, and timely book offers all healthcare practitioners interested and involved in addiction practice a powerful account of an addiction psychiatrist's journey of professional and personal growth, thereby offering readers a unique opportunity to learn deeply from the author's insights, experiences, and struggles in becoming a patient-centred empathic healer. Through sharing and exploring clinical experiences in addiction practice, this fascinating title delves into the lead author and his mentee's personal, professional, and ethical challenges and weaves together science and humanism, offering a wealth of experiential wisdom and tools that have the power to transform our understanding of therapeutic work with people with addictions. Written with empathy and humility, *Humanizing Addiction: Blending Science and Personal Transformation* provides a compelling argument and framework for integrating humanism with empirically grounded practices. This important book is an invaluable resource for healers from a range of backgrounds: physicians, physician assistants, nurse practitioners, social workers, case managers, patient navigators, clinical and health psychologists, pharmacists, counsellors, graduate students, and medical trainees involved in clinical care of people with addiction and substance use problems.

Contents:

Building a Mindset for Healing -- Cultivating Empathy and Emotional Openness in Practice -- Learning and Growing from Unpredictable Encounters -- Scientific Foundations for Addiction Practice -- Historical Context and Theoretical Models of Addiction -- Where Is the Origin of Social Stigma and Pessimism? -- Reasons for Optimism and Hope: Key Issues in Treatment Effectiveness -- The Effect of the Therapist in Addiction Treatment: Relationship Matters -- Motivational Interviewing: My Path towards Clinical and Personal Transformation -- Relapse Prevention -- Pharmacological Treatments -- Seven Robust Scientific Findings Informing Clinical Practices -- Working with Family and Significant Others -- Myths About Families and Addiction -- Impact of Substance Use Disorders on Family and Children -- Typical Concerns of Family Members About Co-Occurring Disorders -- Family-Based Interventions: What Works? -- Spirituality, Religion, and Mutual Support Programs; Introduction -- Spirituality and Religion -- Spiritual and Religious Treatments for Addiction - - Practical Considerations for Healthcare Practitioners About Spirituality and Addiction -- Mutual Support Programs -- The Varieties of Mutual Support Programs -- 12-Step Programs -- Myths About 12-Step Programs -- Scientific Evidence for 12-Step Programs and 12-Step Treatments -- Practical Suggestions for Facilitating 12-Step Involvement -- Reflections from Clinical Practice -- Trainees' Reflections on Clinical and Personal Growth -- Learning to Treat Addictions by Embracing the Spirit of MI: Jen Forsyth, 2016 -- Humanizing Practice Through MI as a Means of Clinical and Personal

Transformation: Isaac Petersen, 2016 -- First Experience Learning to Work Therapeutically Using MI as a Way of Walking In-Step with the Patient: Erin Smith, 2012 -- Humanistic Approach Using MI as a Vehicle for Advocacy for Patients: Brittany Atuahene, 2017 -- Humanistic Approach as Means of Empathic Connection Between Different Walks of Life: Emilie Transue, 2017 - - MI as a Way to Replenish One's Personal (and Clinical!) Spirit: Lauren Goldshen, 2017 -- Humanistic Practice as Means to Self-Discovery: Jennifer Darby, 2017 -- Person-Centered Approach as Supplement to Treating Serious Chronic Illnesses and Understanding the True Meaning of Empathy: M. Usama Hindiye, 2017 -- Humanistic Practice as a Treatment for the Trainee's Soul; Alexandra Sansosti, 2017; Shriya Kaneriya, 2017; Gil Hoftman, 2017; H. Patrick Driscoll, 2018.

[Illicit Drug Use: Legalization, Treatment, or Punishment?](#)

Drug abuse and addiction in the United States has reached the level of an epidemic, the U.S. Department of Health and Human Services reports. More than one million incarcerated people suffer from opioid and other addictions, but only one in ten receives addiction treatment. The debate raging around drug abuse today is whether addicts who commit crime should be sent to jail or to treatment. This book investigates the debate on how to confront illegal drug use and abuse in the United States, using full-color photographs and sidebars to offer readers a complex understanding of the many proposed solutions to this problem.

[Ketamine: from abused drug to rapid-acting antidepressant](#)

This book presents the latest data from basic research and clinical trials supporting the effectiveness of ketamine as a treatment for depression, bipolar disorder, and suicidal behaviour, setting these positive findings within the context of the serious problem of ketamine abuse. The first part of the book focuses on the evidence regarding ketamine abuse, with specific reference to Asian countries, and discusses countermeasures and complication management. It then addresses the mechanisms underlying the antidepressant and side effects of ketamine, which have remained elusive, describing, and discussing important new research findings. Further, it explains insights gained from whole brain imaging in rodents and from behavioral pharmacology, and presents evidence regarding the role of gut microbiota, the NMDA receptor GluN2D subunit, and the lateral habenula in the actions of ketamine. These advances form the basis for the safer use of ketamine in patients with treatment-resistant depression and are expected to lead to the development of new antidepressants.

Contents:

1. Determination of ketamine in the river of China --
2. Ketamine abuse in Taiwan --
3. Ketamine problem in Hong Kong --
4. Hair analysis of ketamine --
5. Brain imaging of ketamine abusers --
6. Management of complications of ketamine abuse --
7. Action site of ketamine in the NMDA receptor channel --
8. Synaptic modulation in the effect of ketamine --
9. Rodents whole-brain imaging in the effects of ketamine --
10. Behavioral

pharmacology of ketamine: An overview of preclinical studies -- 11. Antidepressant potential of ketamine enantiomers -- 12. Effects of ketamine on pain-related depression -- 13. Role of gut microbiota in the antidepressant actions of ketamine and its enantiomers -- 14. The role of NMDA receptor GluN2D subunit in the effects of ketamine and enantiomers -- 15. Roles of the lateral habenula in the actions of ketamine -- 16. Comparison of antidepressant action of ketamine and group II mGlu receptor antagonists -- 17. Antidepressant effects of ketamine in Taiwanese patients with treatment-resistant depression.

[Law, drugs and the making of addiction: just habits](#)

This book considers how largely accepted legal truths' about drugs and addiction are made and sustained through practices of lawyering. Lawyers play a vital and largely underappreciated role in constituting legal certainties about substances and addiction', including links between alcohol and other drugs, and phenomena such as family violence. Such practices exacerbate, sustain and stabilise addicted' realities, with a range of implications - many of them seemingly unjust - for people who use alcohol and other drugs. This book explores these issues, drawing upon data collected for a major international study on alcohol and other drugs in the law, including interviews with lawyers, magistrates, and judges; analyses of case law; and legislation. Focussing on an array of legal practices, including processes of law-making, human rights deliberations, advocacy and negotiation strategies, and the sentencing of offenders, and buttressed by overarching analyses of the ethics and politics of such practices, the book looks at how alcohol and other drug addiction' emerges and is concretised through the everyday work lawyers and decision makers do. Foregrounding practices', the book also shows that law is more fragile than we might assume. It concludes by presenting a blueprint for how lawyers can rethink their advocacy practices in light of this fragility and the opportunities it presents for remaking law and the subjects and objects shaped by it. This ground-breaking book will be of interest not only to those studying and working within the field of alcohol and drug addiction but also to lawyers and judges practising in this area and to scholars in a range of disciplines, including law, science and technology studies, sociology, gender studies and cultural studies.

Contents:

Introduction: Slowing down. Peering in.

Legislative practices: On Human Rights, Jurimorphs and the Fragile Ontology of Law

Advocacy practices: On Legal Strategies, Habits, and the Action of Anticipation

Negotiation practices: On Addiction Veridiction and the Gendering of Agency in Family Violence and Child Protection Cases

Sentencing practices: On Assembling 'Alcohol Effects' and the 'Aboriginal Community' in Criminal Law

Ethical practices: On Rules, Values and Ethics as a 'Matter of Concern'
Conclusion: Making Just Habits. A Blueprint for Onto-advocacy

[Legalizing cannabis: experiences, lessons and scenarios](#)

The book explores how we should evaluate the models of cannabis legalization as they have been implemented in several jurisdictions in the past few years; the specific models for future cannabis legalization that have been developed and how similar or different they are from the models already implemented; as well as the lessons that can be drawn from attempts to regulate other psychoactive substances, such as alcohol, tobacco, pharmaceuticals and "legal highs", and other "vice" activities such as gambling and prostitution.

Contents:

Introduction : the coming cannabis revolution / Tom Decorte, Simon Lenton and Chris Wilkins -- The uneven repeal of cannabis prohibition in the United States / Bryce Pardo -- Practical lessons learned from the first years of the regulated recreational cannabis market in Colorado / Todd Subritzky, Simon Lenton, Simone Pettigrew -- Recreational marijuana legalization in Washington State : benefits and harms / Clayton Mosher and Scott Akins -- A century of cannabis control in Canada : a brief overview of history, context and policy frameworks from prohibition to legalization / Benedikt Fischer, Cayley Russell, Neil Boyd -- Uruguay : the first country to legalize cannabis / Rosario Queirolo -- Cannabis decriminalization policies across the globe / Niamh Eastwood -- More than just counting the plants : different home cannabis cultivation policies, cannabis supply contexts and approaches to their evaluation / Vendula Belackova, Katinka van de Ven, Michaela Roubalova (Stefunkova) -- City-level policies of regulating recreational cannabis in Europe : from pilot projects to local customization? / Tom Blickman & Catherine Sandwell -- Lessons learned from the alcohol regulation perspective / Tim Stockwell, Norman Giesbrecht, Adam Sherk, Gerald Thomas, Kate Vallance and Ashley Wettlaufer -- Lessons from tobacco regulation for cannabis product regulation / Coral Gartner & Wayne Hall -- How not to legalize cannabis: lessons from New Zealand's experiment with regulating legal highs / Marta Rychert -- Coffeeshops in the Netherlands : regulating the front door and the back door / Dirk J. Korf -- Cannabis social clubs in Spain : recent legal developments / Xabier Arana and Òscar Parés -- Swiss cannabis policies / Simon Anderfuhren-Biget, Frank Zobel, Cédric Heeb, Jean-Félix Savary -- The Australian experience and opportunities for cannabis law reform / Caitlin Elizabeth Hughes -- Cannabis policy reform : the Jamaica's experience / Vicki J. Hanson -- The risks of cannabis industry funding of community and drug treatment services : insights from gambling / Chris Wilkins, Marta Rychert -- Insights for the design of Cannabis Social Club regulation / Tom Decorte, Mafalda Pardal -- Conclusion / Chris Wilkins, Simon Lenton and Tom Decorte.

[Long walk out of the woods: a physician's story of addiction, depression, hope, and recovery](#)

A paediatric oncologist and palliative care physician, Dr. Adam B. Hill, suffers stress and disillusionment with the culture of medicine, leading to alcoholism, depression, and suicidal thoughts. Then while in recovery from active addiction, he loses a mentor to suicide, revealing the extent of the burnout epidemic in the medical field. By sharing his harrowing story, Dr. Hill shows how this problem manifests, considers ways to address it, and confronts commonplace attitudes regarding self-care, recovery/treatment, empathy, and vulnerability amongst medical practitioners. His book is a road map for better practices at a time when doctors around the world are struggling in silence.

Contents:

Beginning of the end -- Growing up -- Becoming a bulldog -- A medical education -- Taking up residency -- Dark days -- Into the woods -- Exile -- The prodigal son -- Learning to take care of myself -- Stereotyping and the importance of individual stories -- Standing up to stigma -- The vulnerability to create honest conversations -- Healing with the art of empathy.

[Many Faces, One Voice: Secrets from The Anonymous People](#)

Many Faces, One Voice is a must-read companion book to the award-winning film The Anonymous People. Together with the film, this collection of insights, illuminated by vibrant faces and voices of recovery, takes the reader along a journey of individual growth and, potentially, to world change. A vital record of the lives and testimony of brave people who have come out of the shadows of anonymity to fight stigma and discrimination “people who now publicly advocate for the 23 million Americans suffering with addiction. Their inspiring stories, told in intimate detail, are essential to understanding the success, the hope, and the power of recovery.

[Marijuana legalization: what everyone needs to know](#)

Should we legalize marijuana? If we legalize, what in particular should be legal? Just possessing marijuana and growing your own? Selling and advertising? If selling becomes legal, who gets to sell? Corporations? Co-ops? The government? What regulations should apply? How high should taxes be? Different forms of legalization could bring very different results. This second edition of Marijuana Legalization: What Everyone Needs to Know® discusses what is happening with marijuana policy, describing both the risks and the benefits of using marijuana, without taking sides in the legalization debate. The book details the potential gains and losses from legalization, explores the "middle ground" options between prohibition and commercialized production, and considers the likely impacts of legal marijuana on occasional users, daily users, patients, parents, and employers - and even on drug traffickers.

Contents:

Part I: Marijuana and prohibition -- 1. What is marijuana -- 2. Who uses marijuana? -- 3. What are the risks of using marijuana? -- 4. What is known about the nonmedical benefits of using marijuana? -- 5. What are the medical benefits of marijuana? -- 6. How stringent is marijuana enforcement in the United States? -- Part II: National legalization and its consequences -- 7. What are the pros and cons of legalization generally? -- 8. How is legalization of marijuana different from legalization of other drugs? -- 9. What if we treated marijuana like alcohol? -- 10. How would alcohol-style legalization affect me personally? -- 11. Between marijuana prohibition and commercial legalization: is there any middle ground? -- Part III: The crazy quilt of conflicting policies today -- 12. Where are we, and how did we get here? -- 13. What's really happening in medical -- marijuana states? -- 14. What is happening in Colorado and Washington? -- 15. What is happening in Alaska, Oregon, Jamaica, and Uruguay? -- 16. What happens when marijuana laws clash? -- Part IV: The future of marijuana legalization -- 17. What might the future hold? -- 18. What do the authors think ought to be done about marijuana?

[Pills, powder, and smoke: inside the bloody war on drugs](#)

Like the never-ending war on terror, the drugs war is a multi-billion-dollar industry that won't go down without a fight. Pills, Powder, and Smoke explains why. The war on drugs has been official American policy since the 1970s, with the UK, Europe, and much of the world following suit. It is at best a failed policy, according to bestselling author Antony Loewenstein. Its direct results have included mass incarceration in the US, extreme violence in different parts of the world, the backing of dictatorships, and surging drug addiction globally. And now the Trump administration is unleashing diplomatic and military forces against any softening of the conflict. Pills, Powder, and Smoke investigates the individuals, officials, activists, and traffickers caught up in this deadly war. Travelling through the UK, the US, Australia, Honduras, the Philippines, and Guinea-Bissau, Loewenstein uncovers the secrets of the drug war, why it's so hard to end, and who is really profiting from it. In reporting on the frontlines across the globe--from the streets of London's King's Cross to the killing fields of Central America to major cocaine transit routes in West Africa--Loewenstein reveals how the war on drugs has become the most deadly war in modern times. Designed and inspired by Washington, its agenda has nothing to do with ending drug use or addiction, but is all about controlling markets, territories, and people. Instead, Loewenstein argues, the legalisation and regulation of all drugs would be a much more realistic and humane approach. The evidence presented in this book will persuade many readers that he's right.

Contents:

Introduction -- Honduras -- Guinea-Bissau -- The Philippines -- The United States -- Britain -- Australia -- Solutions -- Conclusion.

[Prescription drug abuse](#)

The misuse and abuse of prescription drugs has reached epidemic proportions in recent years, yet many individuals still believe, incorrectly, that their use is without risk. This book explores those risks as well as controversies surrounding this public health issue.

Contents:

The prescribed epidemic: an overview of prescription drug abuse -- The science of addiction and drug abuse -- "Downers" : sedatives, sleep aids, and anxiolytics -- "Pain-killers" : opioids and opiates -- "Uppers" and performance enhancers : stimulants and related drugs -- The business of medicine -- Harm reduction -- Case studies.

[Prisoner re-entry in the 21st century: critical perspectives of returning home](#)

This ground-breaking edited volume evaluates prisoner re-entry using a critical approach to demonstrate how the many issues surrounding re-entry do not merely intersect but are in fact reinforcing and interdependent. The number of former incarcerated persons with a felony conviction living in the United States has grown significantly in the last decade, reaching into the millions. When men and women are released from prison, their journey encompasses a range of challenges that are unique to each individual, including physical and mental illnesses, substance abuse, gender identity, complicated family dynamics, the denial of rights, and the inability to voice their experiences about returning home. Although scholars focus on the obstacles former prisoners encounter and how to reduce recidivism rates, the main challenge of prisoner re-entry is how multiple interdependent issues overlap in complex ways. By examining prisoner re-entry from various critical perspectives, this volume depicts how the carceral continuum, from incarceration to re-entry, negatively impacts individuals, families, and communities; how the criminal justice system extends different forms of social control that break social networks; and how the shifting nature of prisoner re-entry has created new and complicated obstacles to those affected by the criminal justice system. This volume explores these realities with respect to a range of social, community, political, and policy issues that former incarcerated persons must navigate to successfully re-enter society. A springboard for future critical research and policy discussions, this book will be of interest to U.S. and international researchers and practitioners interested in the topic of prisoner re-entry, as well as graduate and upper-level undergraduate students concerned with contemporary issues in corrections, community-based corrections, critical issues in criminal justice, criminal justice policies, and re-entry.

Contents:

Introduction: Critical Re-entry in the 21st Century KEESHA M. MIDDLEMASS AND CALVINJOHN SMILEY

SECTION I Institutions, Community, and Re-entry

1 Halfway Home: The Thin Line Between Abstinence and the Drug Crisis LIAM MARTIN

- 2 Triaging Rehabilitation: The Retreat of State-Funded Prison Programming
ALLISON GORGA
- 3 The State's Accomplices? Organizations and the Penal State NICOLE
KAUFMAN
- 4 Idaho: A Case Study in Rural Re-entry DEIRDRE CAPUTO-LEVINE

- 31 "I Can't Depend on No Re-entry Program!": Street-Identified Black Men's Critical Reflections on Prison Re-entry YASSER ARAFAT PAYNE, TARA MARIE BROWN, AND CORRY WRIGHT
- Conclusion: What's Next for Critical Re-entry CALVINJOHN SMILEY AND KEESHA M. MIDDLEMASS

[Rethinking drinking and sport: new approaches to sport and alcohol](#)

This book examines the complex nature of sport-related drinking. With close attention to the contradictory nature of sport-related drinking, this book considers both 'the problem' of drinking in sport, as well as some of the issues for treatment and recovery that sports-related drinking presents. Based on research across a variety of sports in the UK and Australia, Rethinking Drinking and Sport explores not only the relationship between alcohol, fans, participants, and industry, but also questions of gender and identity to provide fresh insights into the complex relationships between drinking and sport.

Contents:

Acknowledgments -- Preface -- Social practices and drinking identities -- Mapping the sport-alcohol nexus -- Beyond hegemonic masculinity -- Women and sport-related drinking -- Non-drinking, dry events, and alternative forms of sport -- Biographies of drinking -- Tackling the problem -
- Changing the culture -- Some paradoxes and potentials for recovery and prevention -- Policy and sponsorship -- Rethinking drinking and sport -- Bibliography -- Index.

[Rethinking Drug Courts: International Experiences of a US Policy Export](#)

What are drug courts? Do they work? Why are they so popular? Should countries be expanding them or rolling them back? These are some of the questions this volume attempts to answer. Simultaneously popular and problematic, loved and loathed, drug courts have proven an enduring topic for discussion in international drug policy debates. Starting in Miami in the 1980s and being exported enthusiastically across the world, we now have a range of international case studies to re-examine their effectiveness. Whereas traditional debates tended towards binaries like "do they work?", this volume attempts to unpick their export and implementation, contextualising their efficacy. Instead of a simple yes or no answer, the book provides key insights into the operation of drug courts in various parts of the world. The case studies range from a relatively successful small-scale model in Australia, to the large and unwieldy business of drug courts in the US, to their failed scale-up in Brazil and the small and institutionally adrift models that have been tried in England, Scotland, Wales, and Ireland. The book concludes that although drug courts can be made to work in very specific niche contexts, the singular focus on them as being close to a "silver bullet" obscures the real issues that societies must address, including (but not limited to) a more comprehensive and full-spectrum focus on diverting drug-involved individuals away from the criminal justice system.

Contents:

Intro; _Go Back; _Go Back; Introduction; About the editors and authors; Drug Courts in the United States: Punishment for 'Patients'?; By Joanne Csete; Drug Courts in Australia; By Caitlin Hughes and Marian Shanahan; The Irish Experience: Policy Transfer from US Drug Courts; By John Collins; Drug Policy, Therapeutic Jurisprudence and Criminal Justice in Brazil; By Luiz Guilherme Mendes de Paiva; Explaining the Failure of Drug Courts in the UK; By John Collins; Diversion in the criminal justice system: examining interventions for drug-involved individuals; By Winifred Agnew-Pauley

[Strengths-based approaches to crime and substance use: from drugs and crime to desistance and recovery](#)

Although there is a strong and growing literature in the two areas of desistance and addiction recovery, they have developed along parallel pathways with little systematic assessment of the empirical evidence about the co-occurrence of the relationship or how one area can learn from the other. This book aims to fill that gap by bringing together emerging literature on the relationship between offending and substance use. Instead of focusing on the active period of its onset and persistence, this book examines the mechanisms that support desistance, addiction recovery, and the common themes of reintegration and rehabilitation. With contributions from a wide range of international experts in the fields of desistance and addiction recovery, the book focuses on a strengths-based, relational and community-focused approach to long-term change in offending and drug-using populations, as well as the shared barriers to

effective reintegration for both. This book will be highly informative for a wide audience, from academics and students interested in studying desistance and recovery to those working in addiction services and the criminal justice system as well as policy makers and the people undertaking their own journeys to desistance and recovery.

Contents:

Foreword (Shadd Maruna)

1 Desistance and recovery: Developing an agenda for shared learning (Charlotte Colman and David Best)

2 The relationship between drugs and crime and its implications for recovery and desistance (Paul Turnbull)

3 The history, evidence, and trajectory of substance use disorder recovery (Robert Ashford and Austin Brown)

4 The long-term impacts of probation supervision (Stephen Farrall)

5 How do mechanisms for behaviour change in addiction recovery apply to desistance from offending? Learning lessons from the REC-PATH programme of work (David Best, Charlotte, Colman, Wouter Vanderplasschen, Freya Vander Laenen, Jamie Irving, Michael Edwards, Rebecca Hamer, Thomas Martinelli)

6 Rethinking agency, strengths and change in desistance and recovery: an actor network approach (Michael Savic and Ramez Bathish)

7 Components of identity transition within the desistance process (David Honeywell)

8 Desistance, recovery, and the mobilisation of social capital in different cultures (Dana Segev and Stephen Farrall)

9 Frustrating desistance: Stigma as a barrier to change (Sarah Anderson)

10 Substance Abuse Treatment Research and Outcomes Related to Recovery for Individuals Involved in the Legal System in the United States: Years of Progress and Future Prospects (Kevin Knight, Wayne E.K. Lehman, Danica K. Knight, & Patrick M. Flynn)

11 Broken and mended: Therapeutic processes, recovery, and desistance in a substance use treatment programme for life-sentenced prisoners (Zetta G. Kougiali, Alessandra Fasulo, Adrian Needs & Darren Van Laar)

12 Restorative and Responsive Approaches to Desistance and Recovery (Gale Burford & George S. Leibowitz)

13 The Role of Recovery in Probation and Prison Programs (David Best and Susan Broderick)

14 The Music of Recovery and Desistance: Prison-Based Musical Tuition as a Strengths-Based Intervention (Jo Cursley & Shadd Maruna)

15 An Integrated model of change- Desistance and Recovery (David Best, Rebecca Hamer and Lauren Hall)

16 Promoting relational and strengths-based approaches to illustrating pathways to desistance and recovery. A concluding chapter (David Best & Charlotte Colman)

[Substance misuse and young people: critical issues](#)

Substance Misuse and Young People: Critical Issues is a comprehensive source of information on young people's requirements for assessment, treatment and other interventions because of their misuse of substances. It highlights approaches that enhance understanding of the routes that lead young people to substance misuse and the routes away from it. The emergence of new substances and methods of misuse makes this ever more relevant. The authors are international experts in the fields of psychiatry, paediatrics, medicine, psychology, genetics, resilience, neuropharmacology, and epidemiology. This book acknowledges how widespread both substance misuse and psychiatric disorders are and explores the complex, challenging links between co-occurring conditions. Use of substances is associated with illness and premature mortality, and more so for people who have combined disorders. The authors critically assess the vital need for intervention during adolescence and early adulthood. They provide detailed clinical views of the psychosocial interventions and medications currently available and illustrate them with case studies that emphasise adolescents' experiences and thoughtful lifestyle-specific interventions. This book provides theoretical knowledge and indicates the practical skills that practitioners require for work with young people who misuse substances. It is highly applicable to medical practitioners, psychologists, pharmacists, social workers, police officers, probation officers, educationalists, and related social and healthcare professionals.

Contents:

Chapter 1: Setting the scene: Young people who use and misuse substances
By Ilana B. Crome, Richard Williams

Chapter 2: The historical context of drug use by young people By Alex Mold

Chapter 3: Drug use from adolescence to later years: Persistence or progress? By Roy Robertson, Saket Priyadarshi, James Robertson

Chapter 4: The nature of adolescence and its family, societal, community, cultural and developmental challenges By John Drury

Chapter 5: Psychosocial resilience, adaptive capacities and the psychosocial approach By Richard Williams, Verity Kemp

Chapter 6: Acute management of substance use disorders in youth By Darren Courtney, Robert Milin

Part 2: Epidemiology and determinants of substance use and misuse

Chapter 7: Epidemiology of substance use disorders among young people
By Martin Frisher, Sam Weston

Chapter 8: Psychological determinants of substance misuse by young people
By Paul McArdle

Chapter 9: Genetic and environmental determinants of adolescent alcohol use
By Toni-Kim Clarke, Richard C. Crist

Chapter 10: Substance misuse and young people: Reward mechanisms
By Liam Nestor, David Nutt

Chapter 11: Pharmacogenetics of opioid addiction: Are they relevant to young people? By Fleur Davey, Alexander Baldacchino
Part 3: The drugs that are used and misused.
Chapter 12: Central nervous system depressants By Roger Bloor, Xenofon Sgouros
Chapter 13: Stimulants and psychedelics By Roger Bloor, Xenofon Sgouros
Chapter 14: Cannabis By Xenofon Sgouros
Chapter 15: Novel psychoactive substances and inhalants By Roger Bloor, Xenofon Sgouros
Part 4: Young people who have particular needs.
Chapter 16: Long-term care management of young people: Substance use and misuse by young people who have long-term conditions By Helena Gleeson, Janet E. McDonagh
Chapter 17: Young people who use and misuse substances while they are pregnant By Laura Brandt, Laura Moser, Gabriele Fischer
Chapter 18: Substance misuse and comorbid psychiatric disorders By Alka Ahuja, Ilana B. Crome
Chapter 19: Substance misuse and forensic adolescent mental health By Sue Bailey, Prathiba Chitsabesan, Louise Theodosiou
Part 5: Needs assessment, screening and diagnosis.
Chapter 20: Needs assessment: Assessing the needs of young people who use or misuse substances By Roger Bloor
Chapter 21: Classification and diagnosis: ICD-10 and DSM-5 and their application to substance use disorders in young people By Xenofon Sgouros
Chapter 22: Screening and standardised assessment By Roger Bloor
Chapter 23: Diagnostic laboratory investigations By Roger Bloor
Part 6: Intervening to help young people.
Chapter 24: Educational and family approaches to drug prevention for young people By Eric Carlin, Jeff Lee
Chapter 25: Psychosocial treatments By Anne Taylor
Chapter 26; Pharmacological interventions By Deborah Judge, Lisa Mellen
Chapter 27: Treatment of adolescents who have co-occurring substance misuse and suicidal behaviours By David B. Goldston, Angela M. Tunno, Christianne Esposito-Smythers
Chapter 28: Towards a learning stance in teams: Developing a community of practice to capture and disseminate what works for whom By Dickon Bevington

[Successful grant writing strategies for health and human service professionals](#)

This edition presents the fundamental principles for effectively securing funds. The book describes an approach to thinking about and engaging in grant writing and the necessary vocabulary and knowledge to effectively read a funding opportunity, determine its appropriateness to pursue vis-à-vis your ideas and level of professional development, and the processes for applying for funding. This edition also includes expanded coverage of key areas such as how to write an effective aims page, considerations for specific types of study designs, how to write a compelling literature review.

Contents:

Why Write a Grant? -- Becoming Familiar with Funding Sources -- Developing Your Ideas for Funding -- Infrastructure to Support Grantsmanship -- Everyone Needs a Mentor -- Strategies for Effective Writing -- Overview of Common Sections of Proposals -- Heart of the Matter : The AIMS -- Background and Significance -- The Approach -- Concept Papers, Pilot Studies, and Supporting Documentation -- Common Pitfalls in Proposals -- Budget Basics -- Putting It All Together to Create a Budget -- Technical Considerations in Budget Development -- Four Project Structures -- Understanding the Process of Collaboration -- Collaborating for Team Science -- Learning about your Institution -- Electronic Considerations -- Understanding the Review Process -- Responding to the Proposal Review -- Welcome to the World of Post-Award -- Building a Program of Research -- A Case Study : Putting it All Together

[Tenacity: How Two Mums Fought a War Against Drugs.](#)

The two true life stories contained in Tenacity span decades -- and two worlds, Australia, and Britain. Told through the painful words of mothers Julie Rose and Marilyn Cowell (as recorded by her daughters, Michelle, and Sarah), this compelling read has no sugar coating as it takes you through Julie's and Marilyn's struggle to get their sons off drugs -- and the tragedies that ensue. These stories highlight the harrowing fact that addiction can happen to anyone and can strike even the best of families. Powerful and hard hitting, this must read serves as an information and education tool for both young people and parents, a lesson not to be ignored.

[The Biology of Desire: why addiction is not a disease.](#)

Through the vivid, true stories of five people who journeyed into and out of addiction, a renowned neuroscientist explains why the 'disease model' of addiction is wrong and illuminates the path to recovery. The psychiatric establishment and rehab industry in the Western world have branded addiction a brain disease, based on evidence that brains change with drug use. But in The Biology of Desire, cognitive neuroscientist and former addict Marc Lewis makes a convincing case that addiction is not a disease and shows why the disease model has become an obstacle to healing. Lewis reveals addict.

Contents:

Introduction; 1 Defining Addiction; 2 A Brain Designed for Addiction; 3 When Craving Comes to Power; 4 The Tunnel of Attention; 5 Donna's Secret Identity; 6 Johnny Needs a Drink; 7 Nothing for Alice; 8 Biology, Biography, and Addiction; 9 Developing Beyond Addiction; Acknowledgements.

[The Business of Cannabis: New Policies for the New Marijuana Industry.](#)

What happens when corporate culture takes over counterculture? This book explores the contradictions present within the cannabis industry from a business and policy perspective. Despite the unique culture surrounding cannabis, this new industry follows the same economic principles as does any other agricultural product—that is, it would if the federal government allowed it to. Four distinct challenges prevent the cannabis industry from becoming fully legal and federally regulated in the United States, equivalent to the alcohol, pharmaceutical, or tobacco industries: federal regulations counter to state laws, an unfriendly financial system, a U.S. attorney general bent on keeping the drug war running, and Prohibition's 70-year-old legacy of distrust between legalization advocates and opponents. Policy, however, is changing. Already the world's most heavily consumed illicit drug is in the midst of an international transformation. Globally, a new international trade market has emerged from efforts to legalize it for medical or recreational use, and in the United States, the nascent cannabis industry has acquired lobbyists, well-financed industry kingpins, an extensive ancillary industry, and taxation. *The Business of Cannabis* explores these issues in depth and contextualizes U.S. drug policy at a time when lawmakers across the nation are deciding which way to lean on the issue.

Features

Treats the new and growing cannabis industry in the context of more established ones, such as the alcohol, pharmaceutical, and tobacco industries.

Collects experiences and experiments from all the regions, states, and municipalities in which marijuana has been legalized.

Explains how federal regulations or lack thereof (e.g., lack of access to banking) affect the industry.

Explores the interactions of federal, state, and local laws.

Sheds light on the evolution of public policy on legalized marijuana.

[The family context of adolescent drug use](#)

Here is an essential volume for educators, social workers, health care professionals, and parents who are frustrated by the consuming power of drugs over the lives of young people and looking for answers to this enormous problem. In this unique and highly practical volume, experts concentrate on the family--the foundation of mental health and social control--as the most positive force in the prevention of adolescent drug use. Despite the "war on drugs," young people in large numbers continue to use substances. This instructive guide focuses on educating and strengthening families--which makes stronger children who are less likely to use drugs--instead of the traditional efforts based on rehabilitation instead of prevention. It offers instructive background information about societal forces that affect families and make it difficult to raise drug-free youngsters. Family differences are discussed, such as family structure, parenting styles, ethnic and cultural characteristics. Contributors thoroughly examine practical, effective interventions--at home, at school, and with peers--that are positive rather than negative, instructional rather than punitive, and preventive instead of remedial.

Contents:

Introduction I. Adolescent Drug Use: A Family Problem The Institutionalization of Drug Use in America: Hazardous Adolescence, Challenging Parenthood Family Theory and Research on Adolescent Drug Use: A Review II. Family Styles, Stages, and Varieties Contrasting Family Patterns of Adolescent Drug Users and Nonusers Developmental Stages in Drug Use: Changing Family Involvements Ethnic Family Differences in Adolescent Substance Use Personality, Family, and Ecological Influences on Adolescent Drug Use: A Developmental Analysis Families With Attention Deficit Disordered Children and Others at Risk III. Family Interventions Empirical Guidelines for a Family Intervention for Adolescent Drug Use Managing Adolescent Behaviors at School: Implications for Families Peer Relationships, Social Competence, and Substance Abuse Prevention: Implications for the Family

[The Opioid Crisis: Use and Misuse of Prescription, Illicit and Synthetic Opioids](#)

Recently, there has been a rise in opioid use in the United States involving both the nonmedical use of prescription drugs and more traditional illicit opioids, such as heroin. The abuse of prescription opioid pain relievers and illicit opioids have contributed to increasing numbers of overdose deaths in the United States, and Centers for Disease Control and Prevention data show more than 28,000 opioid overdose deaths in 2014. Chapter 1 reports that medication-assisted treatment (MAT) can more effectively reduce opioid use and increase treatment retention compared to treatment without medication. There has also been a significant increase in the use of man-made (synthetic) opioids, such as fentanyl and fentanyl analogues, as described in chapter 2. Synthetic opioids like fentanyl—a substance 100

times stronger than morphine—accounted for more than 19,000 of the nearly 64,000 overdose deaths in 2016, the most recent year for which federal data are available. Misuse of prescription opioids can lead to overdose and death. Medicare and Medicaid, two of the nation's largest health care programs, provide prescription drug coverage that can include opioids.

Contents:

Chapter 1. Illicit Opioids: While Greater Attention Given to Combating Synthetic Opioids, Agencies Need to Better Assess their Efforts

Chapter 2. Prescription Opioids: Medicare Needs Better Information to Reduce the Risk of Harm to Beneficiaries Statement of Mary Denigan-Macauley

Chapter 3. Policy Options to Increase Physician Training Education in Proper Opioid Prescribing Elayne J. Heisler

Chapter 4. Opioid Addiction: Laws, Regulations, and Other Factors Can Affect Medication-Assisted Treatment Access

Chapter 5. Buprenorphine and the Opioid Crisis: A Primer for Congress Johnathan H. Duff

[The Routledge handbook of community development research](#)

This handbook sets a new research agenda in community development. The contributors redefine existing areas within the context of interdisciplinary research, highlight emerging areas for community development related research, and provide researchers and post-graduate students with ideas and encouragement for future research activity. To do this, the editors have deliberately chosen to frame this book not through a traditional sociological lens of class, race and gender, but through a "Wicked Problems" framework. Drawing upon the work of 37 international authors, in diverse settings such as West Papua, Peru, the USA and Australia; and with methodologies equally as diverse, from case studies and interviews to the use of music and storytelling, this handbook focuses upon five Wicked Problems: forced displacement; family, gender and child related violence; indigenous marginalisation; climate change and food security; and human survival in the context of disaster and recovery work. By drawing together leading scholars from community development, social work and social policy, this handbook provides an up to the minute snapshot of current scholarship as well as signposting several fruitful avenues for future research. This book is both an invaluable resource for both scholars and practitioners and an indispensable teaching tool for use in the classroom and in the field.

Contents:

List of figures; List of tables; List of contributors; Foreword;

Acknowledgements; Introduction; Chapter 1: Wicked problems and

community development - an introductory essay (Lynda Shevellar & Peter Westoby); Part I. Forced Displacement.; Chapter 2: Disruptive rights-based community development in protracted urban refugee contexts: the politics

of legal recognition (Linda Bartolomei, Kristy Ward & Marcela Garrett); Chapter 3: 'They'd just flown away': reflections on shifting gender norms in the context of engagement with asylum seekers and refugees through community music; (Caroline Lenette, Brian Procopis & Paola Caballero); Chapter 4: Underestimating legacy: Lessons learned from mining-caused displacement and resettlement (Rebekah Ramsay & Laura Simpson Reeves); Part II. Family, Gender And Child Related Violence.; Chapter 5: Critical reflections on state-driven support for vulnerable children and orphans in South Africa (Lochner Marais, Carla Sharp, Motsaatbebe Serekoane, Donald Skinner, Jan Cloete, Kholisa Rani, Michelle Pappin & Molefi Lenka); Chapter 6: Community based strategies to combat child trafficking in Indonesia (Harriot Beazley); Chapter 7: Preventing violence against women: The development and evaluation of a CALD community family violence project (Deborah Western & Claire Varley); Part III. Indigenous Marginalisation; Chapter 8: Storying Unarmed Insurgencies: collective narrative methods for researching civil resistance (Jason MacLeod); Chapter 9: Singing on country and singing for country': music in work with Australian Aboriginal communities (Dave Palmer); Chapter 10: Complicating Dynamics: Adapting the Sustainable Livelihoods Framework to a Remote Indigenous Context in Australia (Mark Moran, Laura Simpson Reeves & Alyson Wright); Chapter 11: Martu and Policy Makers: Energising an Experimentalist Approach (Ann Ingamells & Peter Johnson); Chapter 12: Enhancing Aboriginal Child Welfare Through Multi-Sector Community Collaboration (Judy Gillespie); Part IV. Food And Climate; Chapter 13: Stories of climate change and mobility from around the world: Institutional challenges and implications for community development (Sarah Henly-Shepard, Karen E McNamara and Robin Bronen); Chapter 14: Food Sovereignty and Community Economies: A Spanish case study (Rhyall Gordon); Chapter 15: Community Gardens for Social and Food Justice: The Case of Urban Agriculture in Australian Cities (Alec Thornton, Kristen Lyons & Scott Sharpe); Part V. Survival Development; Chapter 16: The place of schools in building community cohesion and resilience: Lessons from a disaster context (Carol Mutch); Chapter 17. From 'Dilemmatic Space' Towards Ecological Practice: Community Development in Disaster Recovery in Queensland, Australia (Peter Westoby & Lynda Shevellar); Chapter 18: Hurricanes, Oil, and Rising Water: The role and work of community development in coastal Louisiana in the intersection of disasters, recovery, and planning for the future (Holly Scheib); Conclusion; Chapter 19: What have we learned? A concluding essay on wicked problems, research, and the contributions of community development (Peter Westoby | Lynda Shevellar); Index

[Transforming addiction: gender, trauma, transdisciplinarity](#)

Addiction is a complex problem that requires more nuanced responses. Transforming Addiction advances addiction research and treatment by promoting transdisciplinary collaboration, the integration of sex and gender, and issues of trauma and mental health. The authors demonstrate these shifts and offer a range of tools, methods, and strategies for responding to the complex factors and forces that produce and shape addiction. In addition to providing practical examples of innovation from a range of perspectives, the contributors demonstrate how addiction spans biological, social, environmental, and economic realms.

Contents:

I. What Is the Promise of Transdisciplinarity? Cracking the Problem of Addiction with a Transformative Approach -- Fostering Transdisciplinarity in Addictions Research Training -- Integrating Trauma with Addiction Research and Treatment -- Of Mice and Wo/Men: Transdisciplinarity in the Laboratory -- Two-Eyed Seeing in Indigenous Addiction Research and Treatment -- II. How Does Transdisciplinarity Work? Linking Addiction, Gender and Trauma in the Neonatal Intensive Care Unit -- Bridging the Biological and the Social in Neuroscience -- Moving towards Transdisciplinarity in Research with Marginalized Populations -- Using Reflexivity to Achieve Transdisciplinarity in Nursing and Social Work -- Trauma and Transdisciplinarity in Women's Addiction Treatment -- Expanding Systematic Reviews Using Transdisciplinarity -- III. What is the Future of Transdisciplinarity? Migrating toward Transdisciplinarity in Addiction Treatment -- Building a Theoretical Bridge for Transdisciplinary Exchange -- The Challenge of Trans-sectoral Policy in Pregnancy and Addiction -- Enlarging Knowledge Translation to Reflect Transdisciplinarity - - The Future of Transdisciplinarity in Addiction.

[Treating opioid addiction](#)

This book addresses opioids and opioid use disorders from epidemiological, clinical, and public health perspectives. It covers detailed information on the nature of opioids, their effects on the human body and brain, prevention, and treatment of opioid addiction. Unlike other texts, the first section of this volume builds a strong historical, neurobiological, and phenomenological foundation for a deep understanding of the topic and the patient. The second section addresses the most challenging issues clinicians face, including pharmacological and psychosocial treatments, harm reduction approaches, alternative approaches to pain management for the non-specialist, and prescribing guidelines. Treating Opioid Addiction is a valuable resource for psychiatrists, psychologists, addiction medicine physicians, primary care physicians, drug addiction counsellors, students, trainees, scholars, and public health officials interested in the effects and impact of opioids in the clinical and epidemiological context.

Contents:

1: Killing More than Pain: Etiology and Remedy for an Opioid Crisis; Introduction; Context: Origin and Growth in the Use of Opioids; Poppies, Pain, and Panacea; Killing More Than Pain: The Double-Edged Sword of Opioids; Conceptual Models for Understanding Drug Epidemics; Epidemiology of Opioid Misuse, Opioid Use Disorder, and Overdose Deaths; Addressing Opioid Misuse, Disorders, and Overdose Deaths; Reducing Supply and Accessibility to Opioids; Demand Reduction: Prevention, Treatment, and Recovery Support Services; Harm Reduction Strategies Conclusions and Future Directions References; 2: Epidemiology: Opioid Use and Related Disorders; Overview of the Medical Complications of Opioid Use and the Opioid Overdose Epidemic; Drivers of the Opioid Overdose Epidemic; Opioid Prescribing; Nonmedical Pharmaceutical Opioid Use; Heroin Use; Opioid Use Disorders; Illicitly Manufactured Fentanyl Use; Social, Political, and Economic Factors; Individual-Level Risk and Protective Factors for Opioid Overdose; Opioid Dose, Potency, Duration of Action, Tolerance, and Route of Administration; Polysubstance Use and Polypharmacy; Benzodiazepines Alcohol Stimulants; Underlying Psychiatric and Medical Comorbidities; Treatment Medications; Conclusions and Implications for Prevention; References; 3: Neurobiology of Addiction: A Disorder of Choice; Introduction; Changes in Salience Detection; Key Systems; Neurobiological Changes; Behavioral Effects; Changes in Stress Signaling; Key Systems; Neurobiological Changes; Behavioral Effects; Changes in Cognition and Control; Key Systems; Neurobiological Changes; Behavioral Effects; Neurobiology of Opioid Addiction; Opioid-Related Neuroadaptations; Opioid Effects on Salience Detection Opioid Effects on Stress Systems Opioid Effects on Cognition and Control Systems; Conclusion: Toward a Framework for Recovery; References; 4: Terminology and Conceptualization of Opioid Use Disorder and Implications for Treatment; Conceptualization of Opioid Addiction; Conceptualization of Opioid Use that Risks Health Consequences; Terminology for Opioid Use that Risks Health Consequences; Terminology for Opioid Use Disorder; Implications of Terminology for Treatment; Conclusions; References; 5: Medication for the Treatment of Opioid Use Disorder; Introduction; Treatment of Withdrawal Maintenance Treatment Agonist Therapy; Buprenorphine; Obtaining the DEA Buprenorphine Waiver; Clinical Use of Buprenorphine; Methadone; Methadone Induction; Antagonist Therapy; Naltrexone; Diversion Control; Non-pharmacological Treatment; Treatment of Opioid Overdose; Additional Considerations; Acute Pain; Concurrent OUD and Other Mental Illness; Integrating Medication Treatment into a Comprehensive Recovery Program for OUD; References; 6: Psychosocial Approaches in the Treatment of Opioid Use Disorders; Introduction; Settings Where Psychosocial OUD Approaches May Be Delivered

[Understanding your grief after a drug-overdose death](#)

Loss is always hard, but when someone you love dies of an accidental drug overdose, the grief that follows can be especially painful and challenging. Readers will learn ideas for coping in the early days after the tragic death, as well as ways to transcend the stigma associated with overdose deaths. The book also explores common thoughts and feelings, the six needs of mourning, self-care essentials, finding hope, and more. Understanding Your Grief After A Drug-Overdose Death is part of Companion Press's Words of Hope and Healing series--empathetic books on grief and other loss-related topics, with just the right amount of education and support.

[What works in crime prevention and rehabilitation: lessons from systematic reviews](#)

Over a decade ago, a concerted effort was made by members of the criminology community, including the editors and contributors of this volume, to bring the practice of systematic reviews to the study of criminology, in order to provide replicable, evidence-based data to answer key questions about the study of crime causation, detection, and prevention. Here, the pioneers in this effort present a comprehensive stock-taking of what has been learned, bringing together, and assessing all major systematic reviews of the effectiveness of criminological interventions, to draw broad conclusions about what works in policing, corrections, developmental prevention, situational prevention, drug abuse treatments, sentencing and deterrence, and communities.

Contents:

Introduction: what works in crime prevention? / David Weisburd, David P. Farrington, and Charlotte Gill -- Developmental and social prevention / David P. Farrington, Friedrich Losel and Maria M. Ttofi -- Community interventions / Charlotte Gill -- Situational prevention / Kate J. Bowers and Shane D. Johnson -- Policing / Cody W. Telep and David Weisburd -- Sentencing and deterrence / Amanda E. Perry -- Correctional programs / David B. Wilson -- Drug interventions / Katy R. Holloway and Trevor H. Bennett -- Qualitative data in systematic reviews / Mimi Ajzenstadt -- Evidence mapping to advance justice practice / Michael S. Caudy, Faye S. Taxman, Lienshang Tang and Carolyn Watson -- Economic analyses / Jacqueline Mallender and Rory Tierney -- Conclusion : what works in crime prevention revisited / David Weisburd, David P. Farrington, and Charlotte Gill.
