

Search tips.

When you want to refine your search technique further than the user guides provided, try these tips and tricks.

1. The [ADF Library WorldCat discovery service](#) matches on exact spelling. Words with alternate spellings should be searched using both spellings for example

Paediatrics / pediatrics

2. Alternatively, wildcards such as ? or * and truncation can be used.

P?ediatrics - this will match both *paediatrics* and *pediatrics*

Medic* - this will find any variation on the word *medicine*

3. Titles containing commonly used words should be restricted to title matching. Click in the search box and select XXXX in Title (where XXXX = your *search term*). Append an index term to your search. For example: ti: is a title keyword search such as ti:alcohol and alcoholism

The screenshot shows the search interface for the Alcohol and Drug Foundation (ADF) library. The search bar contains the query 'ti:alcohol and alcoholism' and a red search button with a magnifying glass icon. Below the search bar, the results are displayed in a list format. The first result is 'Alcohol and alcoholism : international journal of the Medical Council on Alcoholism.' by Medical Council on Alcoholism. The second result is 'Alcohol research & health : the journal of the National Institute on Alcohol Abuse and Alcoholism.' by National Institute on Alcohol Abuse and Alcoholism (U.S.). The third result is 'Alcohol health and research world' by National Institute on Alcohol Abuse and Alcoholism (U.S.). The interface includes a left sidebar with filters for 'Current Search' (Keep selections for subsequent searches, English, eJournal, eMagazine) and 'Refine This Search' (Sort by Library, Group related editions, Expand search with related terms, Held By Library, Publication Year, Language, Format). A right sidebar shows 'Library Link' and 'Advanced Search' options.
