

ADF Translated Resources

Stakeholder Kit.

Introduction

If English isn't your first language, finding good info on tricky topics – like alcohol and drugs – can be hard.

That's why the Alcohol and Drug Foundation has now translated some key information into 14 different languages, ranging from Hindi, Chinese and Arabic to Russian, Tagalog and Vietnamese, and more.

These translated resources are available for you to use and share.

Topics include information about alcohol use, a guide to supporting a loved one who may be using alcohol or other drugs, roadside drug testing and information about crystal methamphetamine (ice).

To help you let your networks know about these much-needed resources, we've put together this kit of easy-to-share content for you
